Ruby-throated Hummingbird

Archilochus colubris — Eastern North America's only breeding hummingbird

Color me! !' Print on white paper | Use colored pencils, markers, or crayons

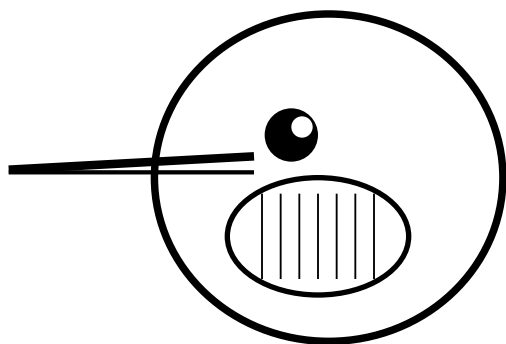

Ruby-throated Hummingbird Facts

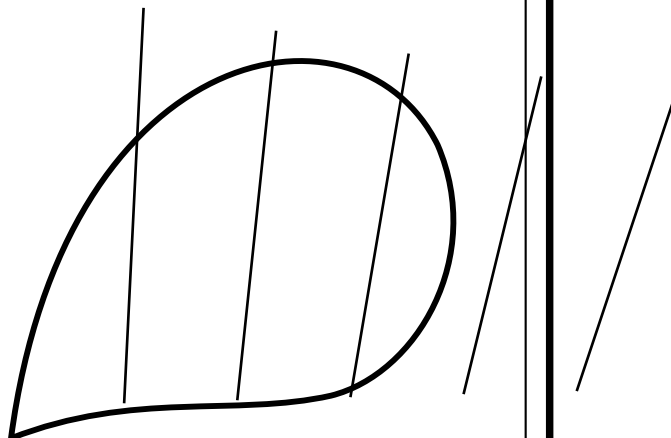

- Males have a brilliant iridescent red throat (gorget) that looks black in dim light.
- The only hummingbird species that breeds east of the Mississippi River.
- Flies non-stop across the 500-mile Gulf of Mexico during fall migration.
- Beats its wings 53 times per second and can fly 25–30 mph in normal flight.
