

Hummingbird Species Pack

8 Species • 12 Coloring Pages • All Levels

Pack Details

- Pages: 12 coloring pages
- Species: 8 North American hummingbirds
- Difficulty: All levels
- Includes: Species info & color guides

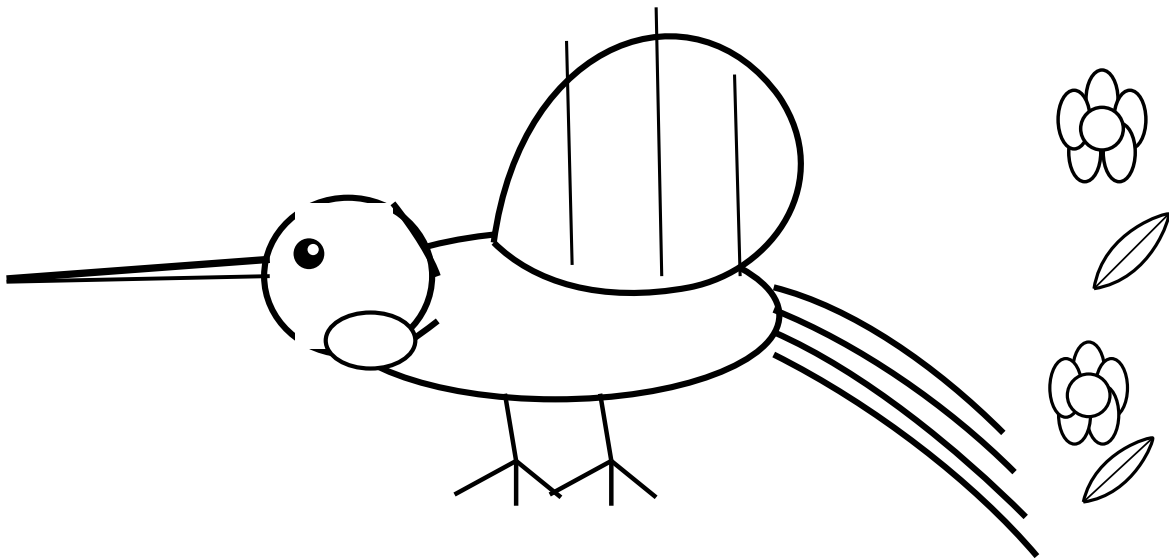

Pro Tip:

Print on cardstock for best results. Use light pencil strokes first, then build up color gradually for a beautiful professional look!

Ruby-throated Hummingbird

Archilochus colubris | Eastern North America

Color me! !' Print on white paper | Use colored pencils, markers, or crayons

Color Guide: Back: emerald green | Throat: ruby red | Belly: grayish-white

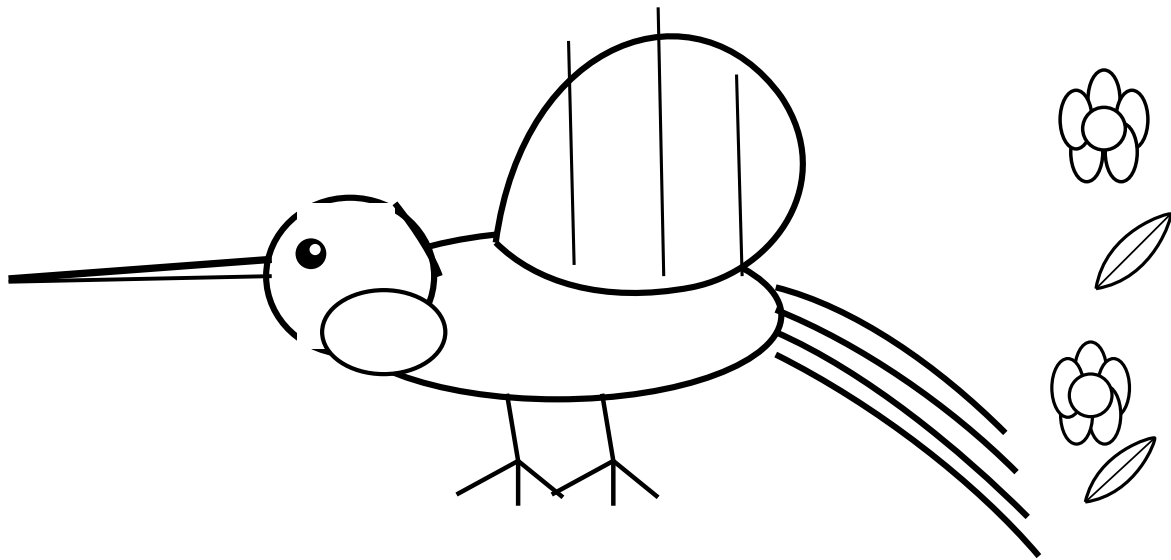

Ruby-throated Hummingbird Facts

- Only hummingbird species breeding east of the Mississippi.
- Males have a brilliant ruby-red gorget; females are white-throated.
- Wingspan: 3.1–4.3 inches; Weight: 0.1–0.2 oz.
- Winters in Central America; migrates 1,200+ miles twice a year.

Anna's Hummingbird

Calypte anna | Pacific Coast, year-round resident

Color me! !' Print on white paper | Use colored pencils, markers, or crayons

Color Guide: Crown & gorget: iridescent rose-pink | Back: green | Belly: grayish

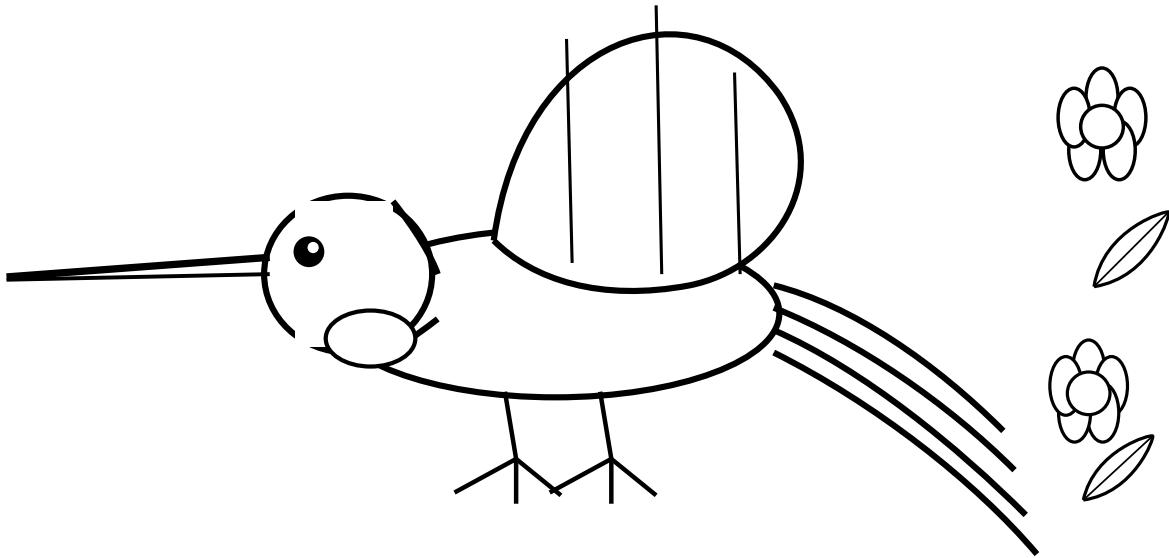

Anna's Hummingbird Facts

- Anna's is one of the few hummingbirds that stays year-round in the US.
- Males have a full rose-pink head and gorget — unique among North American hummers.
- Often sings complex buzzy songs — one of few hummingbird species to sing.
- Commonly seen in California, Oregon, and Washington gardens.

Rufous Hummingbird

Selasphorus rufus | Western North America

Color me! !' Print on white paper | Use colored pencils, markers, or crayons

Color Guide: Back: bright orange-rufous | Gorget: iridescent red-orange | Belly: white

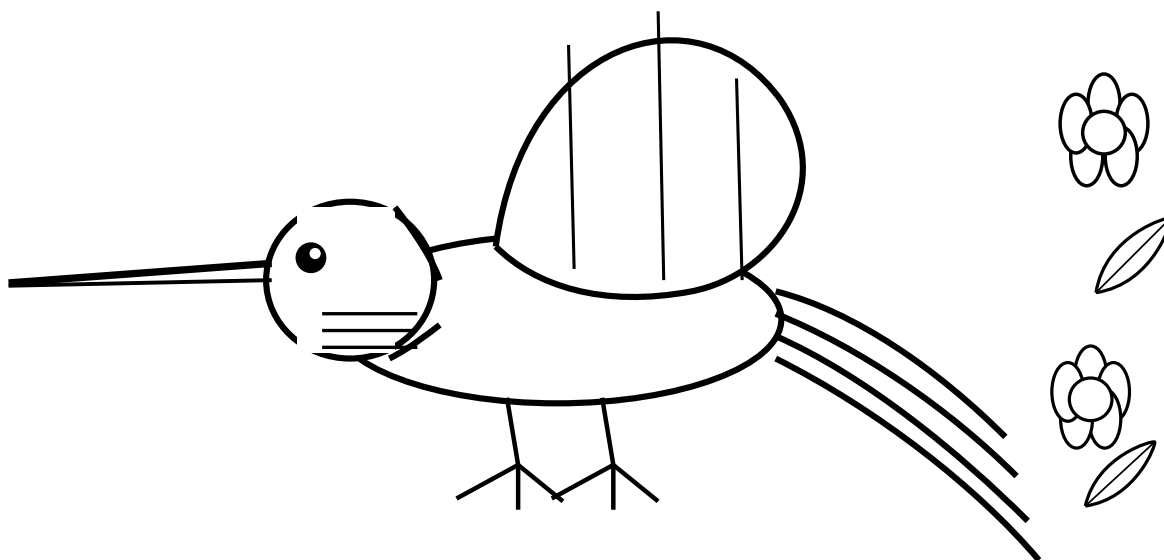

Rufous Hummingbird Facts

- Rufous hummingbirds have the longest migration of any hummingbird — up to 4,000 miles.
- Males are bright orange-rufous; females have rufous sides and green back.
- Extremely feisty — will chase other hummingbirds much larger than themselves.
- Migrates through mountain meadows up to 12,000 feet elevation.

Calliope Hummingbird

Selasphorus calliope | Rocky Mountain West

Color me! !' Print on white paper | Use colored pencils, markers, or crayons

Color Guide: Back: metallic green | Gorget: magenta streaks | Belly: whitish-buff

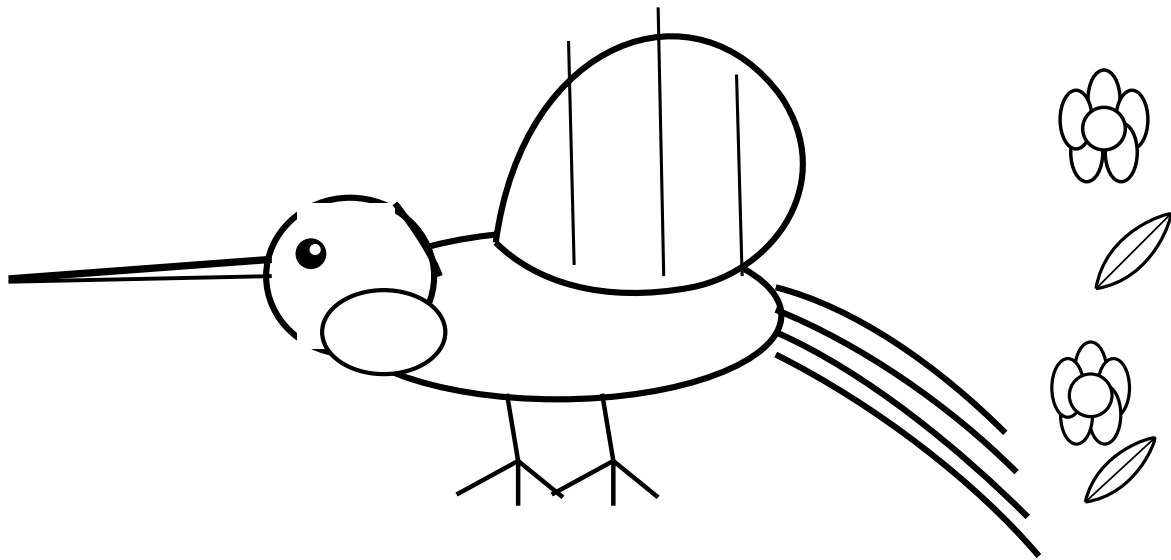

Calliope Hummingbird Facts

- Smallest bird in North America — weighs only 0.1 oz, lighter than a penny.
- Males' gorget is unique: magenta streaks (not a solid patch) on white throat.
- Despite its tiny size, it migrates from western US to Mexico each winter.
- Often found in mountain meadows above 4,000 feet elevation.

Costa's Hummingbird

Calypte costae | Sonoran Desert, California & Arizona

Color me! !' Print on white paper | Use colored pencils, markers, or crayons

Color Guide: Crown & gorget: brilliant violet-purple | Back: green | Belly: whitish

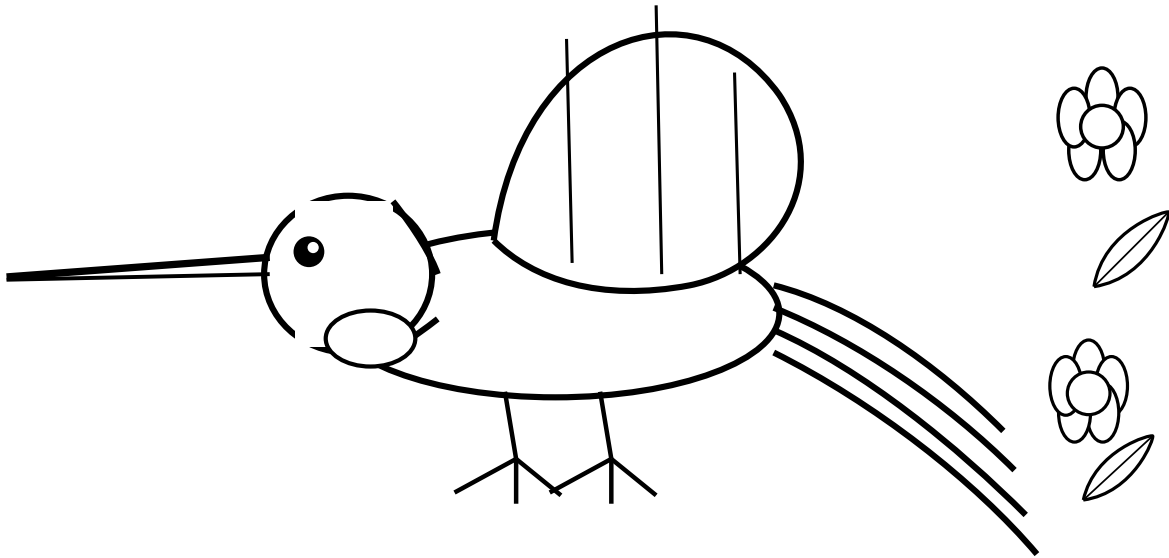

Costa's Hummingbird Facts

- Costa's males have a brilliant purple crown and gorget that extends outward.
- Desert specialist — often active even in extreme summer heat.
- The extended purple gorget feathers give males a 'royal' mustached look.
- Arrives early — often nesting in February in the Sonoran Desert.

Broad-tailed Hummingbird

Selasphorus platycercus | Rocky Mountains & Great Basin

Color me! !' Print on white paper | Use colored pencils, markers, or crayons

Color Guide: Gorget: rose-red | Back: iridescent green | Tail: broad, rufous-edged

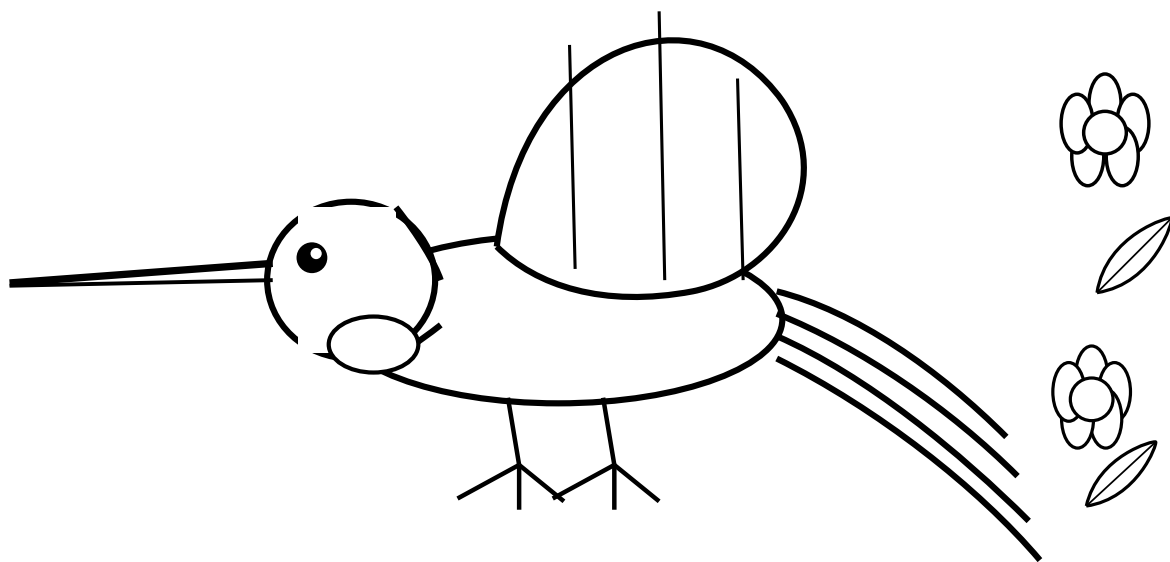

Broad-tailed Hummingbird Facts

- Males produce a loud metallic trill with their wing feathers during flight.
- The wing trill helps males attract females and warn rival males.
- Can enter daily torpor (a sleep-like state) to conserve energy on cold nights.
- Regularly found at feeders in mountain communities from Colorado to Arizona.

Allen's Hummingbird

Selasphorus sasin | California coastal scrub

Color me! !' Print on white paper | Use colored pencils, markers, or crayons

Color Guide: Gorget: iridescent red-orange | Back: green | Sides: rufous

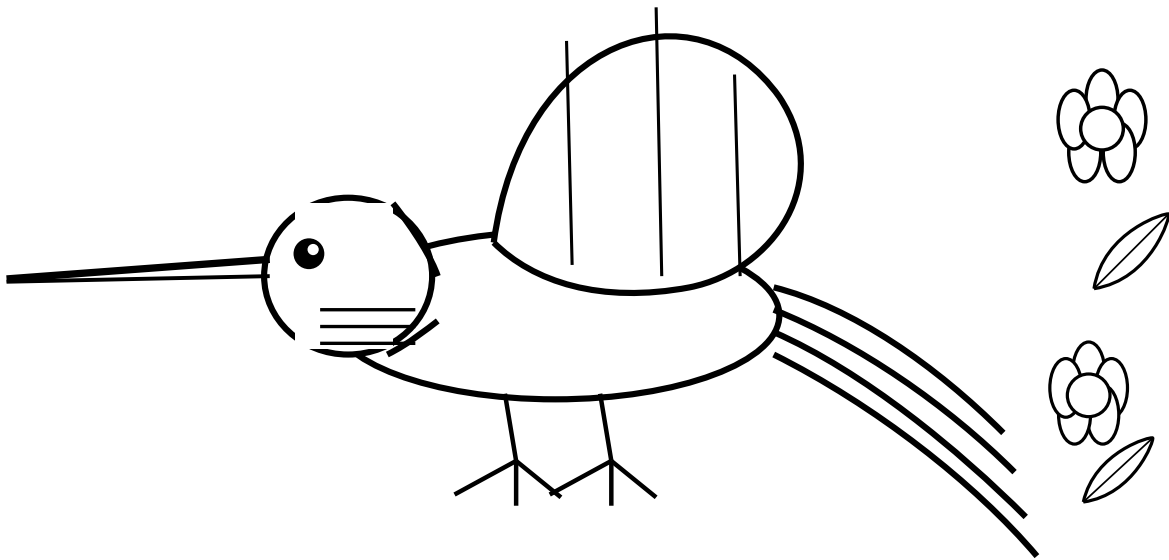

Allen's Hummingbird Facts

- Allen's hummingbird looks nearly identical to Rufous but has a green back.
- Range restricted to coastal California and a small part of southern Oregon.
- Males arrive in late January — one of the earliest spring migrants.
- A resident subspecies lives year-round on the Channel Islands.

Black-chinned Hummingbird

Archilochus alexandri | Western North America

Color me! !' Print on white paper | Use colored pencils, markers, or crayons

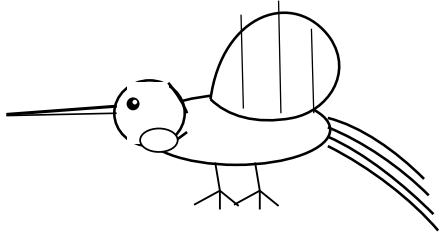

Color Guide: Chin: black | Gorget band: purple | Back: green | Belly: grayish-white

Black-chinned Hummingbird Facts

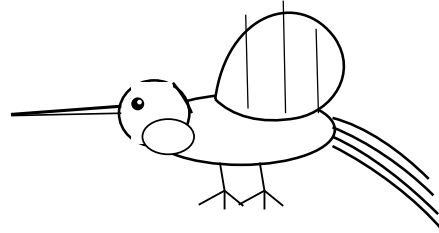

- Males' black chin is bordered by a band of iridescent purple visible in good light.
- Western counterpart of the Ruby-throated Hummingbird — same genus.
- Extremely adaptable — nests from sea level to 8,000 feet in mountains.
- Females build walnut-sized nests held together with spider silk.

Hummingbird Comparison Chart

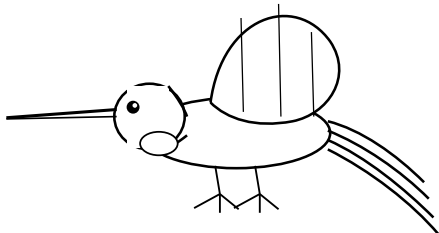

These 8 species live across North America — can you spot them in your yard?

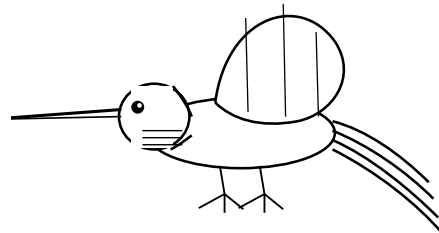

Ruby-throated Hummingbird
Archilochus colubris

Anna's Hummingbird
Calypte anna

Rufous Hummingbird
Selasphorus rufus

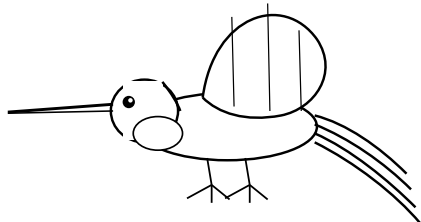

Calliope Hummingbird
Selasphorus calliope

Did You Know?

- There are about 360 species of hummingbirds worldwide — all found only in the Americas.
- North America has about 23 regularly occurring species, mostly in the West.
- Cuba's Bee Hummingbird (*Mellisuga helenae*) is the world's smallest bird at 2.4 inches.
- Hummingbirds are the only birds that can fly backwards, sideways, and hover in place.

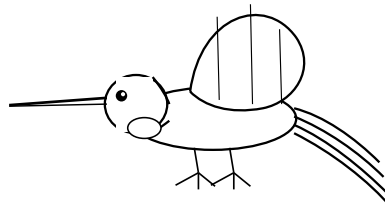

Hummingbird Size Comparison

All hummingbirds are tiny — but some are tinier than others!

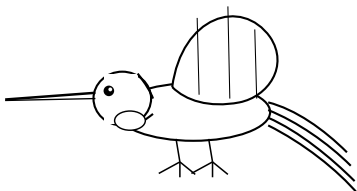

Costa's Hummingbird

Calypte costae

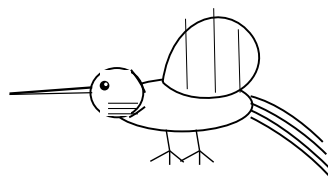

Broad-tailed Hummingbird

Selasphorus platycercus

Allen's Hummingbird

Selasphorus sasin

Black-chinned Hummingbird

Archilochus alexandri
